

CYBER

Achieve real-time situational awareness to anticipate and rapidly respond to cyber threats

Government, military, homeland security and private-sector enterprises are under constant attack from a growing list of potent adversaries that includes nation-states, terrorists groups, hackers and international crime organizations.

KEEPING PACE WITH THE SHIFTING CYBER LANDSCAPE

To meet the growing cyber threat, organizations need a holistic approach to cyber that spans the entire security continuum. As the speed, complexity, volume and persistence of cyber threats continue to accelerate, so does the need for cyber situational awareness.

Engility is ideally suited to help government and commercial enterprises fortify their defenses against advanced cyber threats. We apply the knowledge and insights developed over four decades of solving complex problems within the defense and intelligence communities to the challenges facing our customers.

Our deep understanding of the intelligence community, and the threats posed by cyber actors, is paired with our expertise in cybersecurity operations and cutting-edge technologies to bring insight, advice and solutions to the complex challenges facing our national security customers. Our solutions enable protection, response, mitigation and recovery for the nation's critical networks and the infrastructure dependent on them.

CYBER SITUATIONAL AWARENESS

We specialize in creating comprehensive solutions that help our customers achieve real-time situational awareness, and anticipate and rapidly respond to the shifting cyber landscape. You can count on Engility for cyber solutions that are:

- **Integrated:** We leverage our corporate-wide expertise and experience in cyber security to bring together the right tools, technology and talent to meet each customer's unique requirements.
- **Trusted:** We act as a trusted partner to help solve difficult challenges for vital missions of national importance. Most Engility experts hold high-level security clearances.
- **Innovative:** We are building the next generation of cyber strategies and solutions to keep pace with the rapidly changing cyber ecosystem.
- **Responsive:** Our agility and quick-reaction capabilities help our customers stay one step ahead of evolving situations.

FULL RANGE OF CYBER CAPABILITIES

At Engility, we combine our vast cyber domain expertise with our experience in critical infrastructure protection, cloud computing, wireless and mobility solutions to ensure our customers' applications, infrastructure and information meet regulatory and compliance requirements and are protected at all times.

As part of Engility's CMMI Level 5 Systems Assurance and Governance Engineering (SAGE) framework, our CyberAssure™ toolkit combines tools, expertise and processes to rapidly design and implement solutions with reduced risk. CyberAssure includes:

- Critical infrastructure protection
- Network security assessments
- Monitoring and predictive analysis
- Lifecycle security
- Certification and accreditation (C&A)
- Enterprise system security
- Test and evaluation; independent verification and validation

SECURE DATA ANALYTICS FROM THE CLOUD

Engility is at the forefront of developing distributed and secure cloud architectures that safely process substantial amounts of data. We build advanced intelligence applications using groundbreaking technologies that enable our clients to access, store and manage massive volumes of data seamlessly and securely. From visualization to cloud computing and

information sharing, our clients rely on us to develop robust solutions that meet their specific needs.

THE RIGHT MIX OF TALENT AND TECHNOLOGY

As subject-matter experts, our experienced scientists, engineers, and technology and security professionals play an important role in helping our customers solve difficult problems in safeguarding national security. Through internal research and development programs, we focus on breakthrough technologies in cyber-related areas, from network behavioral analysis to network mission modeling, information assurance and automated code analysis.

Engility's Technology Engineering Research and Analysis Network (TERANet™)—unclassified labs located across the country—enables live or virtual testing of solutions and products, new capabilities and anonymous research.

Whether it's providing analysis, targeting, cyber forensics, network assurance, secure data analytics, mission-critical training or state-of-the-art technical capabilities, we apply the right mix of technology and innovative analytic and scientific services to advance operations and ensure mission success.

ABOUT ENGILITY

Engility is a pure-play government services provider that delivers highly skilled personnel wherever, whenever they are needed in a cost-efficient manner. The company proudly serves customers that span the federal services market including the Department of Defense, the Intelligence community, Space and Federal Civilian agencies. Headquartered in Chantilly, Virginia, Engility is a leading provider of specialized technical consulting, program and business support services, engineering and technology lifecycle support, information technology modernization and sustainment, supply chain services and logistics management, and training and education for the U.S. Government.
