

INFORMATION ASSURANCE (IA) AND INDEPENDENT VALIDATION AND VERIFICATION (IV&V) SERVICES

At 1,230 Nautical Miles From Home, Every Detail is Mission-Critical

Hope is not a strategy when it comes to threats to the systems by which our nation's warfighters depend. That's where Engility comes in — with the IA and IV&V services to help military and government organizations ensure that critical systems remain secure and operational despite growing threats.

Full Range of Capabilities

At Engility, we combine our vast cyber domain expertise with our experience in critical infrastructure protection, cloud computing, wireless and mobility solutions to help ensure your applications, infrastructure and information meet regulatory and compliance requirements and are protected at all times.

As part of Engility's CMMI Level 3 Systems Assurance and Governance Engineering (SAGE) framework, our cyber and information assurance toolkit combines tools, expertise and processes to allow for the rapid design and implementation of solutions with reduced risk. Services include:

- Critical infrastructure protection
- Network security assessments
- Monitoring and predictive analysis
- Lifecycle security
- Certification and accreditation (C&A)
- Enterprise system security
- Enterprise assessments
- Vulnerability assessments
- Wireless assessments
- Information assurance technology solutions
- Security configuration implementation
- Test and evaluation; IV&V

Spotlight on IV&V

Rigorous and efficient IV&V ensures that systems are built correctly from the beginning, reducing total cost to programs and development projects. In addition, IV&V applied with continuous process improvement leads to efficiencies gained from knowledge sharing across programs, shortened schedules, features and functionality users really need to

do their jobs and, overall, a more effective product.

Engility provides IV&V services for a wide range of programs. Providing systems engineering and mission assurance, validating mission requirements, and ensuring that software meets these requirements, Engility is a trusted partner dedicated to advancing our customers' vital missions.

The Right Mix of Talent and Technology

Engility team members are information assurance and IV&V experts — as well as experts in our military's critical systems. They have long experience in all DoD and commercial certification testing processes, proven "IA-911" capability and customer results for military programs, and have supported customers with architectures and interfaces to a variety of networks (including internet and closed networks, NIPRnet/SIPRnet, JWICS and dedicated backbones.)

Engility offers DoD-cleared and certified experts, including DoD IA certification for DoD 8570 (DoDD 8140) IA work force requirements and Navy CA certified/fully qualified validators. Many of our staff are veterans themselves, which affords a unique perspective on and commitment to the national security mission.

About Engility

Engility (NYSE: EGL) is engineered to make a difference. Built on six decades of heritage, Engility is a leading provider of integrated solutions and services, supporting U.S. government customers in the defense, federal civilian, intelligence and space communities. Our innovative, highly technical solutions and engineering capabilities address diverse client missions. We draw upon our team's intimate understanding of customer needs, deep domain expertise and technical skills to help solve our nation's toughest challenges. Headquartered in Chantilly, Virginia, and with offices around the world, Engility's array of specialized technical service offerings include high-performance computing, cybersecurity, enterprise modernization and systems engineering.
